

Sastau, Tikau, Bikau – the Marwari maxim Low-cost, Long-life, Saleable – the Anutone maxim

The popular Marwari maxim and that of successful business communities across the world has been the same. It is time tested and proven. Anutone believes in this, and endows its products with similar attributes.

Consider **Subtex Ceilings**. For the best performance in white grid ceilings these soft-fibre products are low-cost with a long life cycle, and can be easily re-used.

Or consider **Serge Ceilings**. Being metal based, they offer considerable resale value, and are durable for rugged environments with costs linked to the London Metal Exchange!

Or even **Belgravia Ceilings**. Made from very high-quality gypsum, this European product brings enduring values of low lifecycle cost and long installed life. More, it is relocatable or recyclable.

And what about **Strand Ceilings**? 25 years and counting at many installs! This natural, low-cost product lasts generations, and can be easily relocated. Anutone has a robust recycling plan.

Anutone Walls & Ceilings loops e-design every Tuesday morning. If you have missed previous issues please visit www.anutone.com/infobin/edesign.html or contact a Anutone rep.
