

Anutone for Telepresence

A conference table arrangement that can be used both as an independent physical space for normal meetings or linked virtually via telepresence with large screens in the cabinetry to conduct business with several remote locations simultaneously in real time

Telepresence is a hot topic today given its benefits of life-like conferencing obviating the need for travel; the resultant savings being costs and carbon emissions. Anutone detected its potential ahead of time and published a leader in [Acoustic Answers Nov-Dec 2006](#). Anutone, today, offers complete wall and ceiling solutions for Telepresence Rooms ensuring single-source turnkey responsibility.

Telepresence Rooms are finished in a double-wall-and-ceiling configuration.

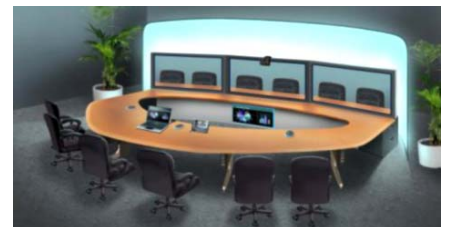

The outer wall or Iso Wall is clad with [AnutoneSeptum](#) on [AnutoneStudd](#) framework with an infill of [AnutoneSynth](#). The inner wall or Abs Wall is clad with [AnutonePixel](#), finished with [AnutoneSmery](#). The unique feature is precise colouration to the requirements of life-like visual requirements without impacting human skin tones.

The primary ceiling is [AnutoneSeptum](#) whereas the secondary ceiling is [AnutoneSubtex](#) that provides excellent light reflectance and the practicality of plenum access for services like HVAC, luminaries etc. The unique feature is the diffused, shadow-less uplighting so crucial for life-like image transmission.

All the components that make up the wall and ceiling system are from Anutone; lab-certified, factory-finished that ensure hassle-free, zero-snag install. No multiple vendor sourcing, no incompatibility issues etc.

All this and more ensures glitch-free microphone and camera alignment resulting in superlative performances of the Telepresence Room for remote audiences. Beyond Telepresence, Anutone has successfully deployed this technology in AV conference rooms, Network Operating Centres (NOC) and other such spaces.

A typical conferencing furniture in a telepresence environment. 6 chairs physically placed around the table on one side with another 6 chairs 'virtually' placed on the other side to make it a 12-seater.

AnutoneSubtex ceilings with diffused uplighting and AnutoneSmery walls with precise colouration provide the right visual environment so crucial for Telepresence Rooms. Of course, acoustics is assured ... after all, it is our middle name!
