

White is Green

With Anutone's White Ceiling Systems

Subtex Nubby

Installed on Skelet O15 with Screenline at perimeter
Size 600x600x15mm with Steppe edge. Subtex Nubby is 0.9 NRC texture ceiling whose engineered surface aids diffused uplighting. Works best for open-plan and conference rooms in offices.

TEXTURES

Belgravia Pixel

Installed on Skelet U15 with Screenline at perimeter
Size 600x600x15mm with Steppe edge. Belgravia Pixel is microperf gypsum ceiling that guarantees a very stable ceiling and different aesthetics

PLASTERS

Serge Lay-in

Installed on Skelet T15
Size 600x600x15mm with Steppe edge. Serge Lay-in is grid metal ceiling for durability. Works best for corridors and those areas where utilities run through plenum and frequent shift of ceiling tiles is required.

METALS

Slats Haya

Installed on Skelet CC18
Size 160x2400x16mm with Tongue-Groove edge. AnutoneSlats Haya L16 is acoustic fibreboard with lineal perforations. It is installed as ceiling and wall in speciality spaces.

WOODS

Anutone
Stall # 16 & 17

India's Flagship event on Green Buildings

International Conference & Exhibition on Green Buildings

9 - 12 September 2009

HICC, Hyderabad, India

A Green Revolution, of a different kind, beckons you, from Anutone Wall & Ceilings. It is exciting as also easy - given the 3Rs approach Anutone imparts to your interior finishes.

REDUCE

Anutone is selflessly committed to the green building movement even if it means reduced business from projects! In a bid to reduce the use of products and yet improve the ambience, Anutone has developed concepts like Carnival Floats and Celebration Clouds for ceilings.

REUSE

Anutone wall and ceiling solutions are from dry construction products and very modular - meaning they can be easily assembled, dismantled and reused. Again this could be termed as a self-goal since Anutone could lose repeat business! Many of Anutone products are made from reused products.

RECYCLE

Most Anutone products can be recycled. Products like Smooth are recycled at Anutone's Bangalore plant to be made into Septum. Similarly Snazz can be recycled as filler for plasterboards; Synth can go back to the polyfibre industry etc. Serge being metal can easily be scrapped.

Anutone is an ISO 9001:2000 & ISO 14001:2004 certified company. Anutone is a member of Confederation of Indian Industry and Indian Green Building Council.

Optimise the use of interior surfacing materials by opting for Anutone, and bolster the green building movement. Yes, a Green Revolution beckons you.
