

# Snazz Slate

## for ceilings in general areas

Snazz Slate is a fire and moisture-resist gypsum board with taper edges for a smooth, seamless ceiling. It is used in all general areas and more importantly to achieve transitions between different types of ceilings, for example, from Sisoli mineral fibre to Serge metal to Subtex texture etc.

Anutone provides the complete suspension system and transition trims to successfully cope with the challenges of such complex ceilings.

Slate belongs to the Anutone's Snazz family of plaster-based ceilings.

### Form

|                       |                |
|-----------------------|----------------|
| <b>Surface finish</b> | Plaster        |
| <b>Ceiling type</b>   | Span           |
| <b>System name</b>    | Snazz Slate    |
| <b>Size (mm)</b>      | 1200x2400x12.5 |
| <b>Edge</b>           | Taper          |
| <b>Suspension</b>     | Strut CC25     |

### Function

|                                   |              |
|-----------------------------------|--------------|
| <b>Weight (kgs/m<sup>2</sup>)</b> | 9            |
| <b>FR</b>                         | 1/A          |
| <b>LR (%)</b>                     | 80 (painted) |
| <b>NRC</b>                        | na           |
| <b>RH</b>                         | 90           |
| <b>TC (u)</b>                     | na           |
