

Acoustic Gypsum Ceilings

Plaza for grid & Designpanel 900 for span

Acoustic gypsum has virtually invisible microperf and is introduced to the India market by Anutone with Danogips of Denmark. It can no longer be perceived as an expensive ceiling solution - grid or span - as Anutone has introduced two value products that ensure considerable cost savings with no reduction in functional performance!

Plaza Pixel is the economical solution to Belgravia Pixel for 2x2 grid ceilings

Plaza Pixel ceiling is best highlighted by using a narrow grid system like Skelet O15 or T15. Plaza Pixel is fast and easy to mount as all edges remain concealed above the grid. Plaza Pixel is also used as a margin panel for Belgravia Pixel. Plaza Pixel being 40% less expensive than Belgravia Pixel is a boon for value projects.

Designpanel 900 is the economical solution to Designpanel 1200 for full-span ceilings

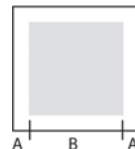

Designpanel Pixel results in full-span, seamless ceilings. Since the 1200 model is bulky to handle and perceived as expensive, Anutone introduces the 900 model in a very easy 900x2700mm size that is popular across the world and is 20% less expensive.

Readily available!

Both Plaza Pixel and Designpanel 900 Pixel are readily available with Anutone for offices, hotels, hospitals, malls.

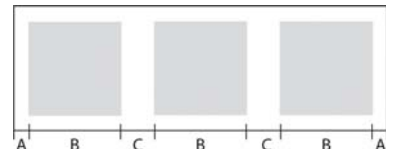

To know more about Plaza Pixel and Designpanel 900 Pixel, visit www.anutone.com/plasters.htm. Anutone Interiors loops e-newsletters every Tuesday. If you have missed previous issues please visit www.anutone.com/infobin/eneewsletter.html
