

Ceiling on Floor!

Carnival Floats – assembled down, hoisted up!

Architectural spaces are there to be designed. The ideas belong to the designer. Anutone can enable designers capture ideas and turn them from concept to reality. Think islands in the sky and Carnival Floats is the reality. Yes! Whether it is for initial design or an afterthought, Carnival Floats with Skelet Infinity is for all seasons. Now all the more with a special feature to assemble on floor and hoist up!

Creating light coves, ceiling clouds, floating islands, projected transitions and design accents with modular tiles suspended on grid or a seamless finish with gypsum is easy and simple thanks to the innovation of Carnival Floats. Functionally it can be superior too as Carnival Floats provide greater sound absorption than a continuous ceiling of the same surface area because the soundwaves are absorbed from both surfaces of the float – the exposed bottom surface and the non-exposed top surface.

FEATURES

- Very high aesthetic value and visual appeal
- Superior acoustical performance – both absorb sound surfaces
- Flexibility in layout and sizing of ceiling floats
- Multi level – imparts the illusion of overhead movement
- Integration of multi products & large format panels

And now here comes the icing on the cake!

Because of the Primary Carrier as a special feature, Carnival Floats can be assembled on the floor and then hoisted up thus making it very easy and very quick for the contractor to install ceiling islands at project sites!

Interlock - quick assembly
