AnutoneSwank - Solutions for Hotel Ceilings

Ceiling requirements for hospitality sector - restaurants, hotels, resorts - are getting more and more complex which becomes a challenge for architects to meet the specific requirements of large projects. Anutone works closely with architects, right from the concept stage to site handover, to realise ceilings that truly perform! Anutone deploys AnutoneStyle – its solutions package for hotel ceilings.

DESIGN

Anutone solution team interacts with the project ecosystem through the process. Each space within the hospitality development is micro-assessed for its requirements of form and function, right from aesthetics to acoustics, fire codes, daylight views, green building requirements etc. These requirements are precisely addressed by Anutone's vast array of ceiling systems.

SUPPLY

Anutone's portfolio of ceiling systems possibly fulfils every need of the project ecosystem. From fine textures to metals, from microperfs to vinyls, from mineral fibre to naturals- all in standard, large, plank or float format. What's more, Anutone can deliver ceiling panels in shapes and curves apart from floats and clouds.

The vast array of ceiling systems is matched by supporting components and accessories that include perimeter trims, transitions, bulkheads, bandrasters etc. Engineering solutions are provided for large span ceilings below wide-aspect ducting, special luminaries, ceiling junctions with bay windows and HVAC pockets, multi-level and multi-product ceilings etc.

ANUTONESTYLE - VALUE PROPOSITION

AnutoneStyle solutions for mall ceilings provides benefits to all the stakeholders of the ecosystem. Here is how:

Features	Benefits
Striking visuals	Architect
Quiet interiors	Acoustical Consultant
Lightweight add-on	Structural Consultant
Environment friendly	Green Consultant
Daylight views	Lighting Consultant
Corporate branding	Signage Consultant
Thermal comfort	HVAC Consultant
Fire rating	Insurance
Snag-free install	Contractor
Easy integration	Other Vendors
Quick project turnaround	Project Manager
Easy maintenance	Facility Manager
Economical, asset appreciation	Property Developer
Occupancy levels	Hotel Operator
Pleasant experience	Guest

SYSTEMS

Custom is standard at Anutone! Ceiling systems as visualised by the architect including radial, trapezoidal, curves or other seemingly impossible designs are delivered in lab-certified, factory-finished state by Anutone, enabling a top-quality install with near-zero snag list and hence quick project turnaround. The walkthrough below shows how to achieve the best of ceilings for your hotel.

WALKTHROUGH - FRONT OF HOUSE

Entrance

The entrance lobby provides the first impression for the guest and needs to be visually striking to set the tone for the rest of the journey. A two-level ceiling works very well with the primary ceiling consisting of **Subtex Ebony** on Skelet Ebony in grid format to create a neutral but contrasting background to what is to follow. The secondary ceiling consists of **Shapes ST Clouds** in dazzling white, suspended discretely. Each Cloud also acts as an energy-saving, giant lighting reflector.

The reception area features **Stretch SLS** fabric ceilings, with a smooth, seamless surface for diffused uplighting, to add to the welcoming mood.

Behind the reception is the cloakroom which features the very functional **Strand** natural ceilings in grid format on Skelet T24 suspension.

Business Centre

Just behind the reception is the backoffice and also the business centre. A small space is given more volume with an open plenum and **Subtex Carnival Floats** grid/discrete ceiling. Subtex provides a brilliant white surface to aid daylight views and also as a diffusive reflector for uplighting.

Atrium Corridors

The corridors around the atrium have **Designpanel Pixel** microperf in combination with **Slate** unperf gypsum ceilings in span format for a true smooth and seamless finish. Areas that need plenum access, for service support, sport the matching **Belgravia Pixel** microperf gypsum ceiling in grid format with **Skelet U15**.

Atrium

The atrium roof features **Wave GLD** baffles, in a riot of colours, suspended vertically. This allows the skylight to come right through and yet provide a colourful and interesting ambience to the atrium void. The baffles can be draped with the hotel branding or theme graphics.

Health Club

Guest multi-activity spaces like the health club and gym feature a maintenance-free and warm ambience wood-based ceiling as in **Spots MP3** with downlighting focussed on the equipment.

Guestrooms

The most important space in a hotel are the guestrooms. Ceilings need to be smooth, seamless and feature-less for guests to feel serene when they lie down and look up after the hard day of work. Anutone's wonder choice is **Stretch SLS**, a dry ceiling installed in a jiffy with entire floor of rooms completed in over a night! The room vestibule can feature Slats wood ceiling.

Guestrooms Corridors

Serge Auriga Hook-on metal ceilings that span across the corridor width and feature the almost invisible microperf work the best. The plenum is easily accessible, the panels are easy to maintain with just a wet-wipe and the aesthetics are solid bestowing confidence on those who walk the corridors.

Fine Dining

A unique combination of wood and metal ceiling in colour-combined **Carnival Floats** below a black plenum does the trick! **Slit** wood ceilings and **Serge Auriga** metal ceilings in **Skelet Infinity** suspension with concealed grids is the right choice. The assembly and its components are easy to clean and maintain; are rugged and durable for longlasting use.

Lounge Bar

The lounge bar and nightclub features a primary ceiling of **Septum** or **MAT BSB** which keeps the noise and vibration within the space and ensures none of it leaks to the guestrooms. The secondary ceiling is of **Stretch SLS Ebony** the black surface of which provides the dark background necessary for bright discotheque lights as well as sound absorption for the high-decibel noise.

Banquet Hall

The banquet hall is the moneyspinner for a hotel and usually works 24x7. Guestrooms depend on hotel occupancy rates but the banquet hall is forever occupied with wedding receptions, product launches, fashion shows, tradeshow, seminars and other corporate or entertainment events.

A primary ceiling of **Septum** or **MAT BSB** which keeps the noise and vibration within the space and ensures none of it leaks to the guestrooms is a must. Below that the secondary ceiling consists of **Pixel Smery** that offers a light texture surface painted brilliant white or to architect's choice. The ceiling is smooth, seamless, yet sound absorbing.

WALKTHROUGH - BACK OF HOUSE

Utilities

The mechanical rooms that include the airconditioning plant feature the every popular **Serge Nebula Lay-in** metal ceilings for easy access and durability. Plus the noise spaces get much-needed sound absorption

Washrooms

For quiet spaces like washrooms, **Serge Aquila Clip-in** metal ceilings are most appropriate.

Kitchens

Kitchens are better served with the cleaner **Matvin Stella** vinyl ceilings in grid format.

INSTALL

Anutone provides project support and assigns its engineers to site at regular intervals to handhold the main contractor and the ceiling contractor in the execution of the ceiling solution and ensure high fidelity between design intent and project reality.

CONCLUSION

Anutone works as a true friend of the architect for ceilings in hotel projects. This frees up valuable bandwidth and time of the architect and allows the designer to focus on other areas of concern. Anutone thus adds value to the architect's practice and ensures the ecosystem feels good about hotel ceilings!
