INNOVATION GALORE

Anutone Interiors recently unveiled a new range of acoustic products and system solutions for architectural space design. The new generation products are included under two broad categories, viz Salon Series and Tufbloc. The Salon Series comes with as many as six variants in wood plastic composites (WPC) made of 100 per cent recyclable wood and thermoplastics, while Tufbloc has indigenously developed high density fibre-mesh reinforced (HDFR) boards that makes the application surfaces toughest to withstand any eventuality. The Salon Series products are water and weather resistant.

Contact: Anutone Accoustics Limited, 231, 7th Cross, Indiranagar 1st Stage, Bengaluru - 560 038.

Tel: 080-2520 2803/2804/3114.

DOOR SOLUTIONS

Everest Smart Steel Doors, a new perception in door solutions is a robust weapon against burglars and miscreants. It is a composition entirely made up of steel, layered with hi-tech honeycomb craft paper with an attractive wood finished appearance. They ensure safety without compromising on the aesthetics and promise security for the home with the 5in1 locking system operated by a single main key which converts this steel door into a foolproof security system. Price ranges between Rs 13,000 - 16,000.

COMPOSITE BEAUTY

Euro Ceramics launches composite marble, the product that combines beauty and exclusive designs and finds application on floors, wall cladding, staircase, bathrooms, window sills etc. Interestingly it looks exactly like natural marble and is composed of technologically reconstituted material and creates unique visual effects. It is environment-friendly and is an excellent substitute for natural stones. This elegant range is procured from Italy and varied other parts of the world.
