Salon Spots

Round perfed wood ceilings and walls

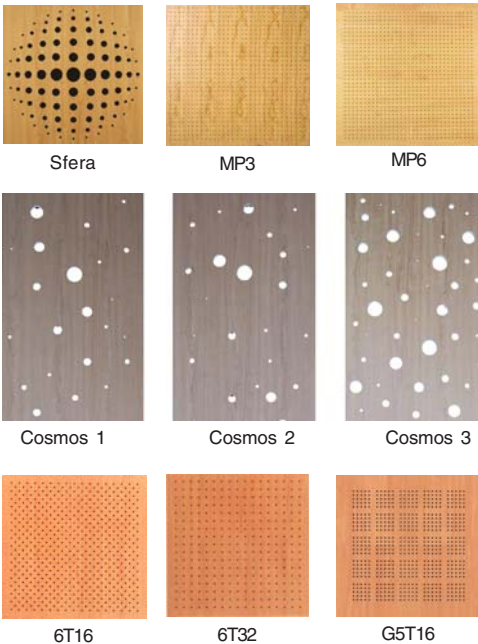

AnutoneSpots are perfed wood panels with circular perforations that allow soundwaves to pass through and get absorbed by the acoustic fabric.

What's new?

Sfera and Cosmos - Anutone launches two new designer perforation patterns. Sfera imparts an illusion of convexity. Cosmos with random perforations of differential diameters is a delight to the architect and acoustician.

MP3 microperf - 3mm at 16mm - Anutone pushes the envelope to the limits of wood engineering with 3mm perforations in HD FR fibreboard.

Styles

Finishes

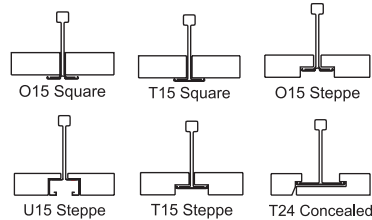

The veneer shades and patterns depicted in the pictures above are an approximate reproduction of the actual shades and patterns. Differences may appear between pictures and products.

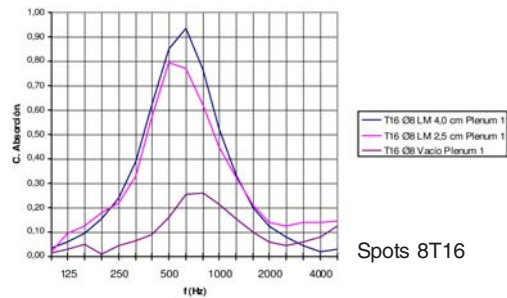

Sizes

Sfera 600x600mm only. Cosmos 600x1200mm only. All others upto 1200mm width and 2400 mm length.

Acoustics

Spots 8T16

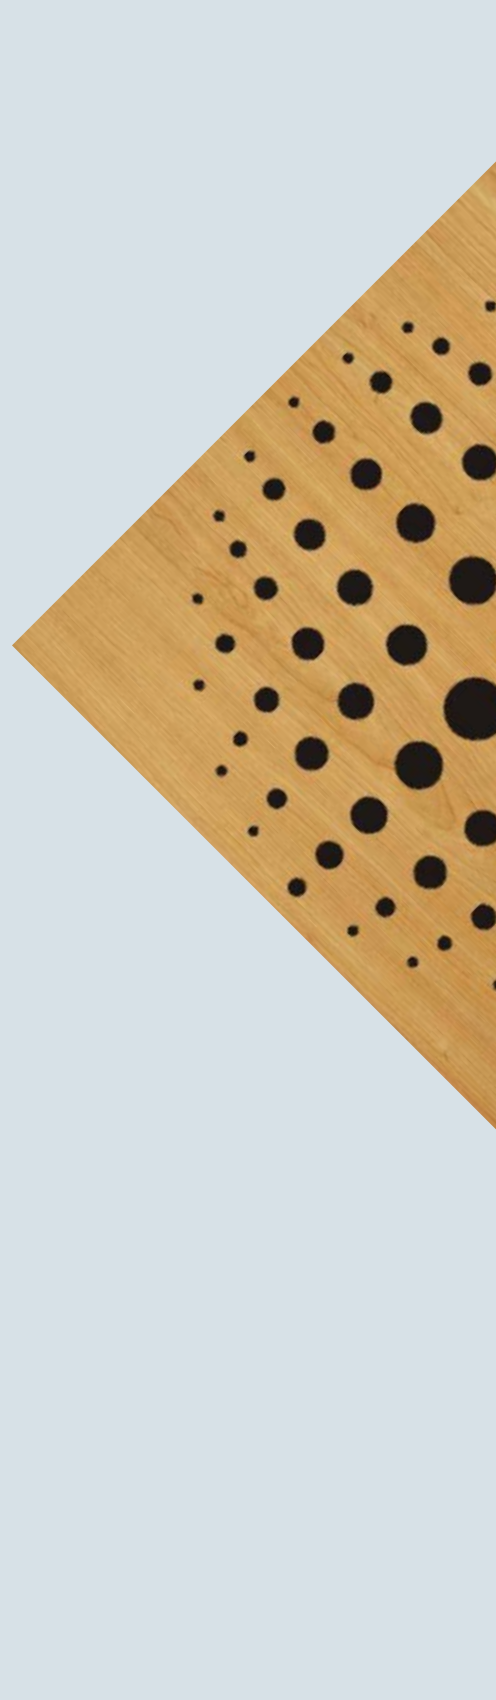

Applications

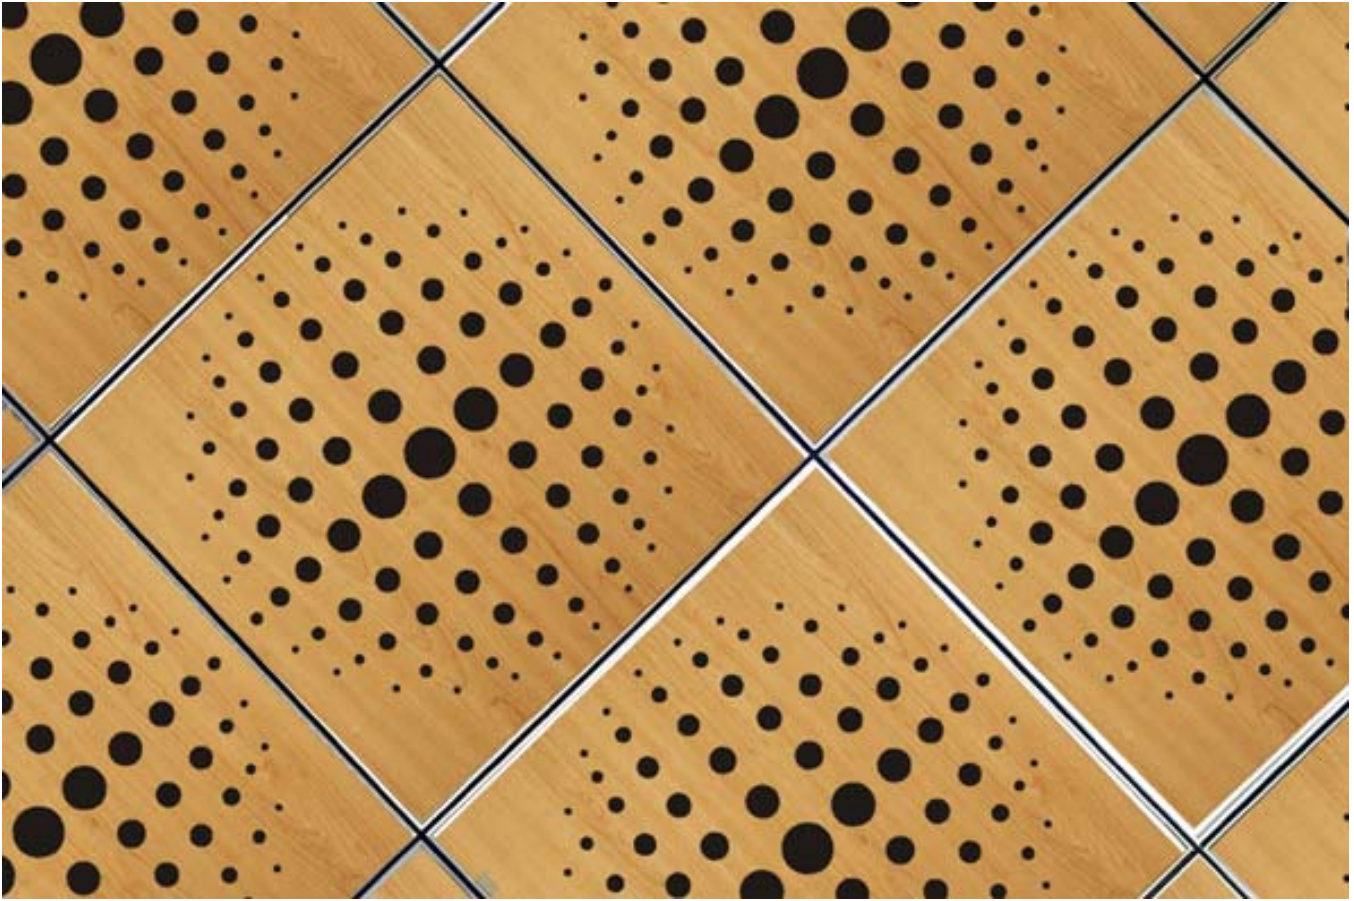

Designer walls and ceilings in airports, hotels, restaurants, offices, malls, studios, home theatres - and wherever the warmth of wood and the quality of factory-finished, lab-certified panels is a requisite.

Technical Summary

Ceiling type	Grid
Tile format	Standard, Large
Surface	Melamine, Veneer
Core	Fibreboard
Geometry	Flat
Thickness (mm)	12
Size (mm)	upto 1200mm width and 2400 mm length
Density (Kg/m ³)	750 for FR
Weight (Kg/m ²)	9 for FR
Fire (Class)	Class A
NRC	upto 0.75
Thermal (W/mk)	na
Climate (°C, RH)	45, 70
Light (%)	70 for Beech
Green (VoC, RC%)	Low, 50%
Warranty	3 years
Colour	See chart
Maintenance	Dry Wipe, Wet Wipe
