Snazz Designpanel 900

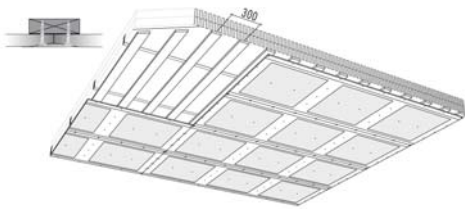

Optimum method for large ceilings means using Designpanel 900 with tapered edges

Designpanel 900 offers scope for a ceiling design with large, continuous surfaces. Combined with acoustic control, perforations are used, taking the shape of patterns embossed almost plastically into the surface.

Designpanel 900 is fitted with tapered edges along the long edges, on request it can be made with tapered edges on all four edges, giving an even and smooth intermediate joint filling between panels and reducing cracking.

FRAMEWORK - DIRECT

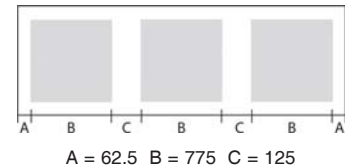

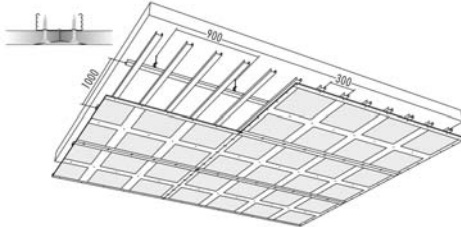

The wall and/or ceiling is fitted onto AnutoneStrut framework. AnutoneStrut CC25 is installed perpendicularly to the Designpanel 900 on the wall/ceiling at 300mm centres. The maximum distance for the fasteners is 300mm centres. All short edge joints of Designpanel must be supported.

Measurements are in mm

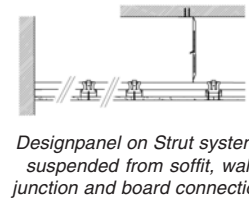

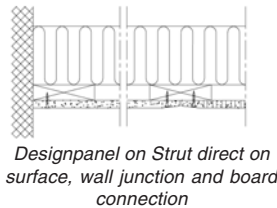

FRAMEWORK - SUSPENDED

The ceiling is fitted onto AnutoneStrut. The system consists of MC45 at 1000mm centres and CC25 at 300mm centres. The hangers are at 900mm centres. The system is constructed with a central distance of 300 mm perpendicularly to the Designpanel 900. All short edge joints must be supported.

DETAIL

Designpanel 900 on Strut framework respectively.

Technical Summary

SI #	Description	Designpanel 900
1	Thickness (mm)	12.5
2	Size (mm)	900 x 2700
3	Core	Gypsum plaster
4	Nominal Density (Kg/m ³)	800
5	Weight (Kgs/m ²)	9
6	Edge	Taper (long edges)
7	NRC	Upto 0.75
8	Fire	Class A2 S1 / d0
9	Moisture Resistance (%)	RH 70
10	Light Reflectance (%)	80
11	Warranty	5 Years
12	Installation	Strut CC25
13	Colour	Painted White or Choice
14	Maintenance	Vacuum or wet wipe with damp cloth

900 Comparison with 1200

Description	1200	900
Thickness (mm)	12.5	12.5
Perf pattern size	475x475	775x775
Board size	1200x2400	900x2700
Cost (Rs./m ²)*	1,244.00	1,063.00
